Change in products for the self-tests to establish proof of SARS-CoV-2 antigen

In the future, the antigen self-test called WANTAI SARS-CoV-2 AG rapid test (Colloidal Gold) will be provided instead of the Watmind self-test. It has the advantage that it can be used both as a “loli” test and with a nasal swab.

The aforementioned antigen self-test has a CE mark according to IVDD 98/79/EC. The user manuals of the product are included in an attachment. In addition, a video of the manufacturer is available which can be accessed by scanning the QR code on the packaging or the user manual.
